

THE EMPRESS EXPRESS

VOLUME XVI No. 37

EMPRESS, ALTA. THURSDAY, Feb. 14, 1929

Price: \$2.00 Per Year

United Church

The Church School, 2:00 p.m.
Public Worship, 7:30 p.m.
Subject, "Heads"
Are we masters of our mood or do they master us? Are we the products of our moods, or are we the creatures that have moods.
You are invited to come and worship with us.
Rev. Geo. A. Shields,
Minister.

Percy Chapman Passes Away

The death took place on Monday, of Percy John Chapman of Vandyue, Alta. Deceased had been ailing for some time, contracting "flu" and pneumonia. He was born in Wiltshire, England. Funeral is to take place today at St. Peter and St. Paul Church, Cleveland, Rev. Father Sullivan will conduct the service. We join in the general expressions of sympathy for Mr. Chapman in her bereavement.

CARD OF THANKS

We wish to thank friends and neighbors for their kindness and sympathy during our recent bereavement also those sending floral tributes, the United Church Choir and local G.W.V.'s.
—Mrs. Geo. World and Mr. and Mrs. J. World.

DINNER TIME

Watch your food and watch health.
Health is but a wise man's wealth.
Health is wealth and you get your money's worth in this restaurant. Wholesomeness abides in this, the home of modern dishes with the old-fashioned flavor.

White Lunch

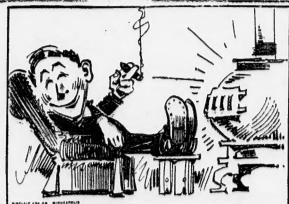

Good Meals at Popular Prices
Give us a trial when in town

Local Oratorical Contestant Competes at Bassano

Stewart McPherson, left for Bassano on Tuesday morning. He was to compete in the oratorical contest there that night. Other contestants were, Miss Quentin Bramley representing Bassano school, Miss Lila Chiffard of Hussar, Miss Miller of Banier and a competitor from Chancellors.
The district winner was to receive \$10 and the runner-up a \$5 gold piece.

Stewart McPherson arrived home from Bassano, Wednesday. While he was unsuccessful in winning first honors in the oratorical contest, he is to be congratulated on winning second place and the \$5 gold piece. Miss Quentin Bramley, of Bassano, was the winner.

Has Feet Frozen

Jim Murray, a farm laborer, who had been staying at the home of Bob Arthur, while out riding horse-back in the south district last week, got lost. He was brought into town for medical assistance with his feet badly frozen. It is questionable or not yet, whether or no, any part of the affected limbs will have to be amputated.

We read that in some parts of Central Africa wells can be purchased for twenty five shillings. Some of these natives have no idea of the value of money.

The Empress BAKERY

Good Prizes for Local Bospiel

The annual Bospiel of the Empress Cycling Club, commences next Tuesday, February 19. It is not known at this date how many riders will be competing, but the quality of the prizes should induce keen competition. There will be four leading events: The Pencil, Anderson, Storey and Mac Charles competitions. The prizes as gathered at present are:

1st Prizes--4 Auto Rides; 4 10.00 Sweaters; 4 6.00 Scaoters; 4 Parker Pen Sets, 10.50 a set.

2nd Prizes--4 Hams; 4 6.00 Tin Pine; the remainder of those prizes have not been decided on yet.

Grand Aggregate Prize--4 Waterman Fountain Pens.

The prizes, we believe constitute some of the best that have ever been offered at a local bospiel. If the weather will continue as at present some enjoyable games should result.

Starvation Period For Chicks

Experimental work carried on at the Poultry Division, Experimental Farm, Ottawa, to determine the amount of time that should elapse between the completion of the hatch and the giving of first feed, has shown some interesting results. An experiment carried on during 1928 gave rather judicious results but showed no greater mortality on feeding after twenty four or thirty-six hour periods than when the birds were starved for a longer time.

This experiment was again continued during 1928. In this case the greatest gain was made by the birds fed sixty hours after hatching followed by those fed twenty-four, forty and ninety hours after hatching respectively. Starvation was equal and greatest to the birds fed a forty and seventy-two hours after hatching with those fed sixty and ninety-six hours next in order. There was no mortality amongst these birds fed twenty-four hours after hatching. In excess did the birds starved and those fed six hours after hatching. Equally with the birds fed thirty-six hours after hatching. The results obtained to date would seem to indicate that chicks may be fed as early as twenty-four hours after hatching with no increase in mortality other than slight gains in mortality.

Geo. World Is Laid To Rest

The funeral of George World who passed away on Thursday, February 7, took place on Sunday, February 10, from the United Church. Deceased was 37 years of age. The church was filled to capacity with sympathizing friends and neighbors from our town and from English and surrounding districts. Many beautiful floral tributes reposed on the casket. Rev. Geo. A. Shields conducted the service and gave a splendid message of hope and cheer to the bereaved ones. Comforting hymns were sung by the choir and congregation, and a duet was rendered by Miss Barnett and Mrs. E. McCune. At the conclusion of the service those present viewed the remains for the last time as they passed on their way out. A large cortege followed the remains to the Empress cemetery, where the last rites were observed and interment took place.

George World, was born at Scarborough, Ontario, Middlesex, England. He came to Canada in 1910, and for two years he and his brother, Jack, lived together in Saskatchewan, after which they came to Empress. During the war, he joined the 15th Batt. C.E.F. as Machine Gunner, and saw three years overseas service. Since then he has been residing on his farm. He married Edith Mary Redgewell, in December, 1927. He was of sterling character and heartily respected by all who knew him. Mr. Frank Griffin, of Edmonton, brother-in-law, was among the chief mourners. There are left to mourn his loss besides his wife, his brother Jack and wife of this district and mother in England, and two brothers at Edmonton, and four sisters.

Buya Holstein Cattle

Mark Mann, who is manager of the Smith estate at Westbury, was in town Wednesday. He had recently concluded a purchase of fifteen head of purebred Holstein milk cows from Alberta, which are to be distributed among the families now settled on the estate.

The fact that chicks will go as long as one hundred hours or more before receiving their first feed is to be looked upon more as a fortunate circumstance which permits of shipping over great distances rather than the best method of husbandry.

Granta Experimental Farm, Ottawa, Ont.

Annual Report of the Empress Chapter of Daughters of the Empire

(From February 1923 to February 1929)

During the past year, the Empress Chapter of the Imperial Order Daughters of the Empire, held the regular meetings with an average attendance of 13.2 members.

It was not necessary to call any special meetings.

Five new members have been elected and sworn in as follows: Madames Kelley, Milne, Hasarab, MacInnes and Leach.

Four members have been removed from our enrollment as they have moved to other localities.

They are Madames Goldie, Manning, Wallace and Road. Mrs. M. G. Boyd removed by death.

The Chapter has had many varied activities. Three Sales of Home Quilting were held, April 18, May 26 and June 9 respectively. Substantial amounts were realized at each. On Empire Day a patriotic celebration was held at the Kitchener School. The weather being fine the exercises were held outdoors. A number of automobiles were in evidence all decorated with flags and colors.

The pupils of each room of the school took part in a programme, after which, the Prize Committee of the local Chapter presented four books as awards as follows:

Kathleen Randall, High School, History Prize.
Forrest Frost, 6th, 7th and 8th grade, History Prize.
Joe. Balasiewicz, 3rd, 4th and 5th, History Prize.

Louise Sibley, 1st and 2nd, Mathematics Prize.
The Flag Trophies for General Proficiency were presented to the scholar from each grade qualifying for same:

The following were the recipients:
Dorothy McCune, Grade I.A.
Lillian Westburg, Grade I.B.
Louise Sibley, Grade I.
Marilyn Drader, Grade II.
Iona Altou, Grade III.
Jon. Balasiewicz, Grade IV.
Russell Hasarab, Grade V.
James Usher, Grade VI.
Kenneth Boswell, Grade VII.
Forrest Frost, Grade VIII.
Kathleen Randall, Grade IX.
Romas Pawlak, Grade X.
Mildred Hutchinson, Grade XI.

A special time was then on.

Annual Meeting of Can. Red Cross At Edmonton

The annual meeting of the Alberta Division of the Canadian Red Cross Society is to be held at the Macdonald Hotel, Edmonton, Saturday, February 23 at 10:00 a.m. There will also be an afternoon session at 2:00 p.m. The first part of the programme, commencing at 10:15 a.m. will be broadcast over C.J.C.A.

joyed by all, when the ladies of the Chapter served Ice Cream comes to each scholar of the school, the Faculty, members of the Chapter and their friends.

On November 10th, 242 Poppies were sold by the Executive and members. A Poppy Day Tea was held. Substantial profits were realized from each enterprise. On November 11th a short formal service was held at the Cenotaph at 11 a.m., when the two-minute silence was observed and a wreath placed on the Monument in memory of the soldiers from this district.

An Armistice Day Service was conducted in the United Church at 7:30 p.m., with the Rev. Geo. A. Shields in charge. Sixteen members of the order attended the service.

Various donations were made during the year as follows: \$10.00 to Scholarship Fund. (cont. on back page)

Coupe

Your
Personal
Car

How seldom the family car is at your disposal. But a personal car, ready at your command, is both a pleasure and convenience. A car that you can drive confidently in traffic, that you can park in an extremely short space, that responds to your lightest touch, with more speed than you will ever need. And above all perhaps in your estimation, a car so smart and distinguished in appearance that it gives a little bit of extra time you are in parked, furnished and gleaming, waiting for you. The New Ford.

N. D. Storey, the Ford Man

More cups to the pound, more flavor in the cup, more tang to the taste. That's what makes Red Rose Tea so popular. Every package guaranteed.

RED ROSE TEA "is good tea"

RED ROSE ORANGE PEKOE is extra good

In the best package—Clean, bright aluminum

About Ourselves

Reading the pages of a little farm machinery magazine the other day, the attention of the writer of this column was drawn to a short article headed "About Ourselves", and, like everybody else, being interested in himself, he proceeded to read it. It appeared to him as more or less a study in the history of the world, and he decided to pass it to the readers of this paper and thus give still wider circulation to a message which all would do well to heed. Here is the article:

"We all want the things that we think will make us happy. We want to own things, to know about things, to go places, to do things, to work out ideas, to win the esteem and respect and affection of folks. The bigger our wants, the more chances we have of being worth while. The person who cares for nothing amounts to nothing. We begin working the day we are born. If we quit wanting, we'll be dead. If we don't want anything, we are hopeless.

"We don't think about our wants, we let little details crowd out the really big, worth while things. The commonest mistake often given for acting foolishly, recklessly, dangerously, selfishly, unnecessary accidents and needless griefs follow. Thinking clears the way for restful action. If we don't think, we are reckless and selfish.

"In order to make our feelings and thoughts count, we must do something. The more times we get good thoughts backed by strong feelings and do nothing, the worse off we are. Doing things tests our thinking and our feelings—enables us to do clearer thinking and work out happier things the next time. If we don't work, we are helpless.

"A slight change in attitude may make a great change in life; the light of a new idea may point the way to the successful working out of a problem; even when we are wrong and we can't see clearly, starting to do something may clear the way.

"What we feel, what we think, and what we do make us what we are." That's the message. Read it over again, then, once again, read the last line. "What we feel, what we think, and what we do, we are."

Now read the first sentence again: "We all want the things that we think will make us happy."

This article is about ourselves. It is a sort of heart to heart talk, a little of personal stock-taking at the beginning of a new year. So, let us ask ourselves some pointed questions.

Granted we want to be happy, were we ever happy while thinking mean, uncharitable thoughts about somebody else? Rather, have not our happier moods been those when kindly thoughts of others occupied our minds?

We will find happiness in the esteem, respect and affection of others. There are few of us but desire to be popular. But can we command these things, or do we deserve them, if, on our part, we are entertaining feelings of contempt and hatred for those around us?

We find joy in doing things, but can we expect to accomplish much if we are arrogant in our attitude towards others, if we insist upon always having our own way, if we are intolerant of the views and opinions and convictions of those with whom we are called upon to work?

A person who is always suspicious of others soon becomes the object of general suspicion. Thinking mean thoughts, cultivating uncharitable feelings, doing unworthy things, may or may not hurt those against whom they are directed, but they most assuredly do hurt the one who indulges in them. They affect his or her whole character. Perseverance in they will even leave their indelible mark upon the conscience with the result that the ugly inner life will be like an open book that all others may read—and then ruin.

The happiness so much desired is not to be found that way; rather it is the death of all happiness.

Remember: "What we feel, what we think, and what we do are."

Give Service Gratuitously

Colorado Doctor Labored For 23 Years Making Much Charge For Medical Attention

Dr. B. A. Arlberg, the "hermit physician," of the rough, mountainous country west of Craig, Colorado, died of poverty recently, after a career devoted solely to gratuitous service of his fellow men.

For 25 years Dr. Arlberg has been the physician in a rugged cattle country, which embraced 100 square miles surrounding the little cabin where he lived alone. He ministered to the ills and hurts of cowboys, homesteaders, cattlemen—and made no charge for his services.

Forty new school districts were established in Alberta in the first nine months of 1928, making a grand total of about 3,500 in the province.

DR. WILLIAMS' PINK PILLS FOR PALE PEOPLE

Excess acid is the common cause of indigestion. It results in pain and sourness about two hours after eating. The quick corrective is an alkali which neutralizes the excess acid. The corrective is Phillips' Milk of Magnesia. It has remained standard with physicians in the 55 years since its invention.

One spoonful of Phillips' Milk of Magnesia neutralizes instantly many times its volume in acid. It is harmless and tasteless and its action is quick. You will never rely on crude cathartics again. You will never again when you learn how quickly, how gently, how pleasantly Phillips' Milk of Magnesia corrects the excess acid. Please let it show you—now.

We are sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acid. Each bottle contains full directions—any druggist.

Help British Unemployed

Canadian Fund Opened By a Toronto Newspaper For Relief of Miners

An indication of the interest which has been aroused in Canada of the plight of the British unemployed, particularly the miners and their families, is given by the response to a fund for their relief, opened by a Toronto newspaper. The fund, the first of its kind opened in Toronto has received the endorsement of Hon. Dr. Ross, lieutenant-governor of the province, and leaders in every section of the industrial, political and religious life of the city.

INFLUENZA'S VICTIMS

Left Weak, Miserable and a Prey To Disease In Many Forms

One of the most treacherous diseases afflicting the people of Canada during the winter months is influenza. It almost invariably ends in a complication of troubles. Its victims suffer with a variety of ailments, such as colds, coughs, sore throats, sinusitis, headaches and backaches. It keeps the blood rich and red by the use of Dr. Williams' Pink Pills. Pink Pills are the only blood-building disease attacks you can banish its deadly after effects through the use of this great blood-building, nerve-restoring tonic.

There is the great power of Dr. Williams' Pink Pills over this trouble. Mr. F. H. McMillen, Belleville, Ont., says: "Some three and a half years ago, following a severe attack of influenza, I was left in a very weak condition, with my blood thin and my digestion, and my blood got thin and weak. In this weakened condition I began the use of Dr. Williams' Pink Pills, and these did what other medicines could not do. They brought me back to health and strength. I can honestly say I think them the best medicine I have ever known, and I shall always praise them."

You can get the pills from your druggist, or write to the nearest box from The Dr. Williams' Medicine Co., Brockville, Ont.

Unique Method Of Testing Farm Seeds

Virginia Department of Agriculture Controls Temperature Of Artificial Spring

A method of stimulating spring seedlings in the field is described in the old family ice box was described at New York before the Association of Official Seed Analysts.

It is used for testing the germination of farm seeds at the Virginia Department of Agriculture, and irrigation. The method involves the use of a prepared chamber and an artificial refrigerator, controlled temperature is obtained over test seeds placed in special soil boxes.

Even the best of spring, so far as they are useful to the fields of the state, are preserved through the action of cold water running through the apparatus and providing the artificial that takes place in open ground.

Spring's sunshine is reproduced in effect through an electric heater, its emanations being distributed from beneath a covering of water.

Your Home Medicine Chest—Always have on hand a supply of Dr. Thomas' Electric Oil. Its manifold usefulness in relieving pain and healing sickness is known by many thousands throughout the land. Always use Dr. Thomas' Electric Oil for relieving rheumatic and neuralgic pains, treating sore throats and chest coughs, burns, scalds, cuts, bruises and sprains.

Worth Finding Out—Dr. F. C. Flaxing is now experimenting with "royal jelly," the food which the bees feed to develop the queen bee. Some specialists think that this stuff, which is said to prolong the life of the queen bee for several years, may have some merit as a tonic for human beings. It is worth trying to find out just what it is composed of.

Greatest Swiss Avalanche—The greatest of Swiss avalanches occurred a century ago when five million tons of ice fell from the Alps.

It is easy to see that three hundred miles an hour from a height of five thousand feet. Ice fragments were flung into the air and fell upon the opposite mountain side.

For toothache use Minnar's Liniment—Jenkins & Co., New, Jaunes, name America's greatest dentist.

Phases (the son of a brother)—General Motors.

W. N. U. 1768

THE EASY WAY

Thousands need cold-olive oil to increase vitality and build up resistance.

Scott's Emulsion

is the easy and pleasant way to exact the most out of your body oil to reinforce your body with strength to build resistance.

Scott & Bowne, Toronto, Ont. 25-8

Baron Munchausen

Never Told These Inquiring Guests Ad To Wonder Of Jasper Park

"The Equator," said the youngest, writing his examinations, "is a menagerie lion running around the earth." Schoolboy howlers are always rich in humor. But the howlers are not always made by schoolboys.

Last summer a lady came up to the transportation desk in Jasper Park to inquire about the motor trip to Mount Edith Cavell and the Angel Glacier. She was very anxious to miss the previous season of the mountains. "When," she asked, "does the Glacier stop?" Then there was the lady who thought that the ledge and the very pretty when it was finished, when the walls were plastered and the ceiling was painted. The well-chinked and cunningly stung together, were meant to be as they were, never entered her consciousness. She knew nothing of the beauty of mountain architecture.

The price, however, goes to the lady who was discussing the wool in the park with one of the wardens. The goats and the sheep are the same species, are they not?" she asked innocently. Which are the males?

"Oh, the goats, madam," said the warden, without batting an eyelid.

The Family Physician.—The good doctor is always worth his fee. But it is not always possible to get a doctor just when you want him. In such cases common sense suggests the use of reliable home remedies, such as Dr. Thomas' Electric Oil, which is wonderfully effective in easing inflammatory pains and healing cuts, scratches, bruises and sprains. The presence of this remedy in the family medicine chest saves many a life.

Soviets Plan Subway—Samuel R. Ross, subway contractor, has confirmed reports that Russian Soviet Government is planning construction of a subway and waterworks to cost about \$150,000 for the city of Moscow, and which may be built and financed by Americans.

No child should be allowed to sleep an hour from worms when prompt relief can be got in a simple but strong remedy—Dr. Thomas' Worm Expeller.

Gravelle, Fla., annually ships more watermelons than any other point in the world.

Wool Returns Much Higher

Last Year's Final Payment To R.C. Shepherds Totalled \$33,000

Between 500 and 600 shepherds throughout British Columbia received a fourth-quarter Christmas present a week before the festive season when the final payment on a loan made on the 1926 wool clip by the British Columbia Wool Growers' Association. This final payment represented a total of \$33,000, a total amount paid for the year's clip was \$109,057, payment being made at \$1.88 cents per pound, as compared with 24.9 cents last year, an increase of 25 per cent. The 1928 wool shipments by the provincial association to the Canadian Co-operative Wool Growers' Ltd., at Weston, Ont., were 343,719 lbs., as compared with 305,500 lbs. in 1927, when the total amount paid out was only \$51,179.

Sore Corns Drop Off If You Use "Putnam's"

When you notice any sign of callosities on the feet or toes—that the time to get on a new pair of PUTNAM'S CORN EXTRACTOR. Do not wait until the corns are so bad that the corn is hard or sore. PUTNAM'S will remove it without pain. It does the work of reality, the dream world of romance—both are yours for the taking. If you will only cultivate a taste for good reading, you will find it interesting and restful. To read good books is to understand yourself better, to realize your responsibilities as a member of human society, more completely through a better understanding of your fellow men. None of us, I suppose, ever attains the end of wisdom, which is to know yourself completely. But the pursuit of that end is about the only pursuit that gives meaning to the human life and remains interesting and restful for its money.

Scarcity Of Seed Oats

Alberta Farmers Are Advised To Arrange For Necessary Supply Early In Season

Farmers throughout the province of Alberta are being advised by the provincial department of agriculture to make the necessary provision for securing the supply of oats for seed, which they will require for their 1929 crop. The effects of frost in a number of districts are coming in a reduction in the germinating quality of a great many of the oats threshed and in a number of cases, supplies of oats suitable for seed have to be shipped in. Elevator companies have expressed their willingness to assist in the distribution of good seed, and farmers are advised to communicate with their local elevator agents as early as possible in order to obviate the possibility of a scarcity occurring during the seeding season.

Miller's Worm Powders attack worms in the stomach and intestines and no worms can come in contact with them and live. They also correct the unhealthy conditions in the digestive organs that encourage worms, setting up reactions that are most beneficial to the growth of the child. They have attacked their power in all cases and at all times are thoroughly trustworthy.

It is said sharks do not attack humans. Then as far as we are concerned, there will be no fight.

Some men take good care of an automobile; others treat it like one of the family.

Coras cannot exist when Holloway's Corn Remedy is applied to them, because it goes to the root and kills the growth.

Science can explain almost everything except why the static is always much stronger when the radio is being shown off to visitors.

Science can explain almost everything except why the static is always much stronger when the radio is being shown off to visitors.

WINDOLITE

MADE IN ENGLAND

COMES WITH A MESSAGE OF HEALTH

THE sun is the all-powerful life producer. Nature's universal light and germ destroyer, as well as stimulant and tonic. WINDOLITE is the sun's most important ray.

Medical science has definitely proved that from the point of view of Health and Hygiene, the most effective among the sun's rays, are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays, so that by using WINDOLITE to brighten light instead of lead-brain-violet rays. Therefore, the invention of WINDOLITE has completely satisfied the long-felt want. Exhaustive experiments have conclusively proved that it is a most effective substitute for glass that it freely admits the Ultra-Violet rays, and that its use as a most beneficial factor in the growth and development of plants and children and on the well-being of cattle, enabled for the first time to have brightly light instead of darkness in their sheds.

Indeed, the discovery of WINDOLITE has during the last six years completely revolutionized gardening, given a new stimulus to poultry breeding, increasing the egg-laying capacity and fertility of chickens, has greatly increased the health and vitality of stock used in domestic and household requirements.

WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unobtrusive, flexible and is easy to cut and use. It is now being successfully used for sunrooms, verandas, schools, factories, hospitals, nurseries, hot beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip. It is a most extraordinary pair of sunburners and is easy to fit. WINDOLITE is supplied in rolls any length but in width of 36 inches only. A square yard of WINDOLITE weighs about 14 oz., while a square yard of glass of ordinary thickness, weighs about 120 to 140 oz. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, f.o.b., Toronto.

Use WINDOLITE and let YOUR PLANTS YOUR CHICKENS YOUR CATTLE Bask in 100% SUNLIGHT

Send for booklet "WINDOLITE"

Distributors: JOHN A. CHANTLER & CO., LTD. 51 Wellington St. W. TORONTO, ONT.

Wide Fluctuations In Grain Prices Are Revealed At Inquiry

Saskatoon—Wide fluctuations in prices obtained by farmers in the same district for grain of identical grades were featured before the closing session of the Royal Grain Commission at Saskatoon recently.

In some cases price levels were above by several cents than the quotations of that day of sale and in others equally below the cash quotations of the day.

Among the farmers testifying were men of from twenty to thirty years' experience as wheat growers. They submitted the evidence of these erratic prices to illustrate for the benefit of the commission the uncertainty and positive hazard of wheat growing.

"We have already learned that the line elevator companies do not pay the same prices in spite of quotation. That is competition," remarked the chairman.

But in many of the cases submitted the margin of difference in payments, particularly for street wheat at points only seven miles apart, for same grades, were not easily accounted for. The commission has experienced at widely separated points in Saskatchewan during the past few weeks much evidence of a similar character. It has resulted in a view being unofficially expressed that the industry is not organized as intelligently as it might be.

But one of the difficulties confronting the commission in these complaints is that the complete details, accurately stated, are not always available. One witness had threshed and shipped a car of grain for which he secured number one grade. Two weeks later he threshed another car of the identical grain and it was graded three.

But the commission discovered almost by accident that rain and frost had occurred in that district between the dates of the first and second shipment. That fact would easily account on a straight trade basis for the different grades obtained from the same field of grain. These are some of the problems put up to the commission by the grain growers. The repetition of such reports without the fact being injected concerning rain or frost between the cutting or threshing provoke much criticism of elevator and mill organizations by farmers, partially because the complete facts are not known.

Terrific Heat In Australia

Sydney, N.S.W.—Terrorific heat of 100 degrees Fahrenheit has been responsible for numerous bush fires in the outer suburbs and further inland. A dozen houses and a quantity of livestock, orchards and crops have been destroyed.

Gun Inventor Dead

Vienna—Baron Von Karl Schott, inventor of the famous 50 calibre howitzer of that name which brought such havoc at Verdun and Ypres and Verdun during the war, is dead. He was 51 years old.

Relief Fund Growing

London.—The lord mayor's fund for relief of distress in the coal fields now totals £2,325,000, exclusive of the government's "poor law" contribution.

Branch Line Programs Of Two Railways May Be Contested

Ottawa.—The official announcement of the C.P.R. branch line program which is to be submitted to Parliament is taken here as meaning that attempts to remove conflict between the two railway companies have failed of success and that parliament will be compelled to arbitrate between them.

But the official bill of branch lines for which the C.P.R. will seek charters from Parliament are several which will be contested by the Canadian National Railways on the ground that they invade Canadian National territory. The full extent of the conflict will not be revealed until the Canadian National branch line program is announced. This program, it is understood, has not yet been formulated and of many thousands of miles will be very large and will call for lines in much of the territory be-

Harvest Help Indux

Hon. Peter Heenan Explains Why Harvesters Were Brought From Britain

Ottawa, Ont.—A total of 75,000 harvesters were needed in western Canada harvest fields last year and as no assurance was forthcoming from the eastern provinces that they would supply 44,000 to add to the west's available 31,000, the federal government was obliged to appeal to Great Britain for men and as a result, the miner-harvester scheme was brought about. This was the explanation of the influx of British harvesters last year to help gather western Canada's wheat crop, given by Hon. Peter Heenan to the labor delegation which presented its legislation program to the federal cabinet.

The federal government had to select itself Mr. Heenan explained, and as the eastern provinces could not assure the government of 44,000 harvesters, it was necessary to bring ten thousand Britishers to help in the harvest fields.

The estimated requirement of 75,000 was made by a committee which investigated the harvesting conditions.

German Report Shows Gold Reserve Increase

Reichsbank Vault Contains Twice As Much As Before War

Berlin.—Five years after the establishment of the German Reichsbank the vaults are reported to contain more than twice as much gold as before the world war.

At the beginning of December the Reichsbank reserves showed a total of 2,650,000 marks worth of gold, while on December 31, 1923, the Reichsbank had only the equivalent of 1,370,000,000 marks in gold. Since 1924 the gold of the Reichsbank shows a constant increase, 1928 being a record year with acquisitions of gold amounting to 787,000 marks until the end of the first week of December.

National Resources Question

No Statement By Premier King In Respect To Province Of Alberta

Ottawa.—Premier Mackenzie King has not yet issued any statement with respect to the return of the national resources to the province of Alberta, and it seems doubtful whether he will discuss the matter until definite agreement is reached.

When Premier Howland was last in Ottawa, it was understood that he would discuss the matter had he arrived at, but that it would be discussed further in correspondence between the two governments.

A dispatch from Edmonton saying what is said to be a new offer by the Dominion indicates that this correspondence is proceeding. The prime minister, however, has made no announcement as yet.

Winning.—An era of expansion resulting in the construction of approximately 1,200 miles of track into virgin country in Western Canada at a cost of \$100,000,000 is being planned by the Canadian Pacific Railway for new lines. This will mean the construction of many thousands of miles extending over a period of five years, it is understood.

Test Saskatchewan Seed

Seed Testing Laboratory Is Established At Saskatoon

Saskatoon.—Saskatchewan seeds will in future be tested in the laboratory of the Dominion Seed Branch of the federal department of agriculture which is being put into operation in rooms occupied by this department here, according to a statement given out recently.

Preparations for opening this laboratory and offices have been under way since December. In all about 3,000 feet of floor space will be occupied.

Nealon Young, of Winnipeg, acting district inspector for the whole district of Saskatchewan will be in charge. Dr. P. T. Wahlen, chief seed analyst of Ottawa, head of all laboratory work in Canada, is here in connection with the opening of the laboratory.

Reach Flin Flon By Auto

This Means Of Transportation A Success During Winter

The Post Man.—For the first time in the history of Northern Manitoba, automobiles are being used this winter as a means of transportation over the trails and lakes between The Pas and Flin Flon, a distance of 400 miles.

Jim Field, a well-known mining man, started out for Flin Flon via Sturgeon Landing and word was received here that he had reached the landing. Two other parties started out on the same trip a little later.

Automobiles are running daily between Cranberry Portage and Cold Lake as well as aeroplanes, tractors, and snowmobiles.

To Broadcast British Campaign Speeches

Broadcasting Debate Between Party Leaders Is Also Proposed

London, Eng.—Radio will play a big part in the political speech making of the coming general election campaign. Addresses by Mr. Neville Chamberlain, at Liverpool, on January 18, and Premier Stanley Baldwin, at Newcastle, on January 21, will both be relayed throughout the country. A proposal to broadcast a debate between the leaders of the three parties the day before the election has been accepted by the Labor party, and it is expected the Conservatives and Liberals will fall in line.

Plans Non-Stop World Flight

Goebel Will Attempt It If Financial Backing Is Assured

Wichita, Kansas.—A non-stop 21,000 mile around-the-world aeroplane flight is the next objective of Arthur Goebel, of Wichita, winner of the solo flight to Honolulu.

The flight will be attempted as soon as preparations can be completed and financial backing assured. Goebel is now in revealing his next endurance flight.

Appointment Is Extended.—Washington.—Sir Ernest Howard, British ambassador to the U.S., has been notified that his appointment was extended until February 1930. His regular term expires next month.

Endangered Many Lives.—Montreal.—Five minutes before the opening of the morning session of St. Edward School here recently a stick of dynamite was found under the teacher's desk. A boy who admitted the deed was charged in juvenile police court with endangering the lives of 600 people.

So once again "Montie," leader of the Chateau Frontenac team, was the first to put his head.

And the Dog Derby is on February 21, 22, 23. One hundred and twenty miles in three laps, with perhaps, men whose names were famous last year—St. Goldard, Heppins, Chevrette and Dupuis.

PREDICTS POLITICAL CRISIS

Arthur Beverley Baxter, the Canadian who is managing editor of the Daily Express, London, who has "spilled the beans," as he himself cheerfully puts it, by announcing that Beverley is prepared to go to the part with the British political parties in Britain in order to effect an empire-wide tariff.

Baxter, who made the announcement during his present visit in Canada, predicts that Beverley's action will result in one of the greatest political crises in British history.

Jim Field, a well-known mining man, started out for Flin Flon via Sturgeon Landing and word was received here that he had reached the landing.

Two other parties started out on the same trip a little later.

Automobiles are running daily between Cranberry Portage and Cold Lake as well as aeroplanes, tractors, and snowmobiles.

Compilation Of Data In Manitoba's Case For Return Of Resources

Fear Trappers Have Perished

No Word Received Since They Started For North In August, 1927

Port Arthur, Ont.—Fear that John Palmquist and John Doe, Port Arthur trappers who quit their home and left in August, 1927, on a trapping and exploration trip into the great Ungava country, have perished, is expressed by friends here.

With the exception of a card, which was received by a Newscanadian reporter from Palmquist when they were at Moose Factory nothing has been heard of or from either since the morning they left their city for Papua, from where they intended heading north through the many streams and overland to the Factory.

The two trappers were equipped for a year's sojourn in the bush and in addition they had established a line of credit with the Hudson Bay at Moose Factory, to have been used in case of necessity.

Although they had before his departure to him and his partner did not expect to be more than a year or fourteen months in the wild lands, as he had important business on hand that would bring him back to the city.

Their ultimate destination was the country lying between the Great White and the Little White rivers, Palmquist expected to trap Arctics for furs. They also hoped to uncover mineral deposits in the Ungava.

Ship Huskies To Byrd

Dogs Required For Pole Expedition Have Left Vancouver

Vancouver.—When the R. M. S. Niagara sailed from Vancouver, Jan. 9, for New Zealand and Australia, she carried 15 young husky dogs for Commander Byrd's Antarctic expedition. The dogs have been housed at the Grouse Mountain kennels here.

The dogs must reach Dunedin, N.Z., by February 7, in time to be taken by the steamer Elmer Bolling for the Antarctic base on the edge of the great ice barrier.

Byrd, agent for the White Pass and Yukon Railways, has completed arrangements for the shipment in response to a recent request by Commander Byrd, it is stated.

New Airplanes Ordered

Five Are Especially Equipped For Patrols In Alberta

Ottawa.—Fourteen new Mohawk planes were ordered by the Department of National Defence for distribution among flying clubs in Eastern Canada and for forest patrol work out of High River, Alta., air station. The order involves more than \$60,000.

The order calls for five machines especially equipped with radio sets, and carrying capacity.

Mr. McLean is expected to deliver special navigation instruments for the difficult patrols in Alberta where it is necessary for pilots to make long flights at high altitude.

Ottawa.—Preparation of Manitoba's briefs and a compilation of data to be placed before the commission which will sit in Ottawa to determine what the Dominion shall do in the matter of natural resources indemnities connected in earnest with the arrival here of Hon. A. H. Hudson, former attorney-general of Manitoba, and for five years a member of parliament for Winnipeg.

A mass of material involving prices paid to the Dominion government for land originally purchased from the Hudson's Bay Company and subsequently sold to farmers, will be examined by the Manitoba provincial officers which have been opened here.

With Mr. Hudson are W. R. Craig, K.C., and Professor Martin, Manitoba's claim to the remaining Hudson's Bay lands, now owned by the Dominion government and the remuneration she will receive for those which have been sold, will be fixed when the commission under Mr. Justice W. F. A. Turgen, Saskatchewan, has contemplated the whole situation.

Saskatchewan's entry into the fight for the return of provincial resources lines up the whole of the western country. Alberta and British Columbia have already made clear their aims.

New Directors Elected

Aberdeen-Angeles Association Announces Appointments For This Year

Brandon.—The election of directors for 1929 of the Canadian Aberdeen-Angeles Association, has been announced by the secretary, F. W. Crawford, as follows:

For Ontario and other eastern provinces, John Love, Elora, Ont.; James Downham, Chelms, Ont.; Col. H. McKewen, London, Ont.

Manitoba—Henry Leader, Burnside; J. H. McGee, Brandon; Saskatchewan—D. L. Lyon, Devon; W. J. F. Warren, Bellevue.

Alberta—F. H. Reed, Lacanville; J. Henderson, Lacanville; Charles Elliott, South Edmonton.

Organization Plans Under Way For World's Grain Exhibition To Be Held In Regina In 1932

Organization plans and business for the World's Grain Exhibition and Conference, to be held in Regina from August 1 to August 13, 1932, were discussed at a meeting of the prairie provinces held in the Hotel Saskatchewan, Regina.

Hon. C. M. Hamilton, minister of agriculture for Saskatchewan, presided, and the members present included: J. A. Mooney, Regina, vice-chairman; Hon. A. Prefontaine, minister of agriculture for Manitoba; H. A. Craig, deputy minister of agriculture for Alberta; C. B. McKee, president of the Regina Board of Trade; F. Hedley Auld, deputy minister of agriculture for Saskatchewan; A. E. Whitmore, vice-president of the Regina Agricultural and Industrial Exhibition Association; Dr. T. Elderkin, manager of the Regina Agricultural and Industrial Exhibition Association.

The executive committee appointed the following officers of the World Grain Show: Executive Committee: Organization: Manager, J. A. Mooney; secretary, Dr. T. Elderkin; treasurer, W. G. Yule, Saskatchewan; supervisor for the Royal Bank of Canada; auditors, G. C. Cooke and Co.

Prizes amounting to at least \$200,000 will be offered in the regular prize list, in addition to which there will be a list of special prizes. A committee consisting of J. A. Mooney and A. E. Whitmore has been appointed to secure contributions towards special prizes, and it is expected that between \$50,000 and \$100,000 will be secured by the committee.

It was decided that there should be two official languages for the conference to be held in Regina, English and French—and the official prize list will also be published in both languages. A preliminary issue of the prize list will consist of 85,000 copies in English and 15,000 copies in French.

A final revision of the prize list will be made when the executive committee meets again at the call of the chair early in April.

It was stated that the executive committee has received the assurance of the Dominion Government that the necessary financial assistance will be forthcoming to finance the organization of the World Grain Exhibition and Conference, and it will be the biggest thing of its kind ever staged in Canada. Inquiries regarding the exhibition have already been received by the executive committee from Australia, New Zealand, India and China, although the committee has not yet undertaken any advertising campaign or distributed prize lists. It is anticipated that the committee will issue its preliminary prize list, the distribution being on a world-wide scale.

In discussing the business details of preliminary organization work the members of the executive committee were unanimous on every step in a lengthy agenda, each item of which was thoroughly discussed. Hon. C. M. Hamilton, chairman of the executive committee, expressed gratification with the co-operation shown by the representatives from Manitoba and Alberta. He regretted that illness had prevented Hon. George Handley, minister of agriculture for Alberta from attending. A great deal of enthusiastic interest was already being taken in the plans for the World Grain Exhibition and Conference, particularly in the grain-growing provinces of Canada, he said, while inquiries had been received from Australia, New Zealand, India and China, although no official communications had been sent to these countries yet.

"At this time, when the supremacy of the grain-producing provinces of Canada in the growing of hard red spring wheat is being challenged on the markets of the world, the World Grain Exhibition and Conference in 1932 should have a great influence in stimulating Canadian producers in the production of wheat of the highest quality," he added.

Hon. A. Prefontaine, minister of

agriculture for Manitoba, declared that Manitoba grain growers were already laying their plans for the World Grain Exhibition. We are right behind the movement, he added, "and our men are eager to enter for the valuable prizes not to mention the honor of winning prizes against the world-wide competition."

Big Farming Plan For Russia

American Will Plant Ten Million Acres Of Land In Russia

The Los Angeles Times published an announcement by Thomas D. Campbell, of Harlow, Mont., and Pasadena, who is said to be America's largest wheat grower, that ten million acres of Soviet Russia's plains are to be planted to wheat and that, with American machinery under his direction.

Campbell stated he would sell from New York this month for Russia to complete arrangements tentatively entered into during a recent visit to this country of a Soviet commission. Campbell said that more than \$100,000,000 worth of American planting and harvesting machinery would be purchased for the work of raising food to feed the Russian people.

Wisdom Of The Chinese

Doctors Had Wonderful Knowledge Of Drugs Five Thousand Years Ago

Five thousand years ago Chinese physicians had a wonderful knowledge of drugs, their remedies and uses. Secrets of which the physicians of the Western world are only now learning, according to the findings of Chinese medical works by Michael J. Hagerly, translator of the United States Department of Agriculture.

Hagerly has been working at the University of California library, making use of the numerous Chinese works available, with the assistance of Mien Wou, graduate student.

"Ma Huang," known to Western scientists as ephedrine sulphate, a recently developed preparation for the treatment of bronchial asthma, hay fever and rhinitis, has been used in China for more than 5,000 years, and is first mentioned, Hagerly has found, in the ancient medical text of Emperor Shen Hung, who reigned from 272 to 209 B.C.

"The drug is an inexpensive and effective substitute for adrenalin in the treatment of catarrhal conditions, such as the chief value to science. Numerous references to the drug, which is derived from a vine, are found in ancient Chinese works collected by the Imperial Chinese Encyclopedia, together with 'cure histories,' prescriptions, citations, etc.—apparently by physicians, and as results obtained.

In the course of Hagerly's translation, it was found for colds to most commonly cited.

British Death Duties

Mortality Among Millionaires Very Heavy Last Year

Mortality among British millionaires happened to be unduly heavy last year, and while regrettable on several accounts, the unusually heavy deaths provides considerable relief to the exchequer. Death duties in 1927 produced \$150,000,000, whereas \$300,000,000 was yielded in only the last nine months.

The estate of Sir George Wills, tobacco magnate, was probated at \$50,000,000, yielding to the treasury \$20,000,000, with nine other large estates paid nearly \$50,000,000 in taxation. Some men whose holdings of this world's goods are large, have attempted to lessen the shock of death duties by creation of trusts or by promoting a limited company to hold their possessions. The movement, however, so far has not reached large proportions for the system has its disadvantages for those practicing it.

Saskatchewan Pool Elevators have now in operation 948 country elevators which have handled since last harvest an average of 22,000 bushels of all grains per elevator. The total receipts as at the middle of December 1928, being approximately 115,000,000 bushels.

Business Was Good

"Snowways, Inc., was the name used by a secret institute in Bremen, Germany, which reaped a harvest from foreigners desirous of entering the United States. The leaders have been arrested.

Ski-ing in the Laurentians

Not a country of wide open spaces but one of long white stretches where snow lies high against snake fences and is faint blue and sometimes gold upon the hill-side. The Laurentians, north of Quebec, are a skier's paradise and the week-end mecca of the daring and the fit. It has come so now that the Canadian Pacific must run Ski-specials from Montreal from one season's end to the other. The enthusiasts in ever-growing numbers take train to a given point and ski down to the next station or the beyond, as time permits or the spirit moves them. The trout streams are frozen, but the resort-owners and the Habitants are beginning to count on the revenue they derive from the ski.

GENERAL SUPERINTENDENT

W. M. Gordon, newly appointed general superintendent, Western Lines, Canadian Pacific Express Company.

The Subconscious Mind

Clear Cut Solutions Of Problems Often Come During Sleep

Everyone who has once gone to sleep baffled by a problem and awakened with a clear-cut solution in his mind knows that ideas often come not as the logical sequel to conscious thought, but inexplicably, in a flash of sudden insight. Experiences such as that of Dr. Banting, who declares that the idea of using insulin in the treatment of diabetes came to him at two o'clock in the morning, are probably far more common than is supposed.

Perhaps, the great mathematician, used to sleep on his problems. When he woke he had not infrequently the solution in his mind. Psychologists would say that while he slept his subconscious mind continued to work just as the subconscious mind performs feats in the case of calculating child prodigies. The subconscious mind is never idle, and its manifestations are not infrequently peculiarly happy. It is, in fact, the most useful of servants; the drawback is that we cannot control it—London Daily Times.

Served His Purpose

Virginia Man Found Of Diseases Purged Thirty Years Ago

A pair of spectacles, purchased at a county store thirty years ago for two cents, still served W. Blage Modest, 83-year-old citizen of Lacey, Va., first public school teacher in the county and for forty years mayor of property assessment books in the county commissioner of revenue's office. Mr. Modest, an expert accountant, takes pride in being the owner of the glasses. The work he has been doing throughout the years has been of a most intricate kind, where accuracy was the prime demand.

Original "Mother Machree" Dead

Mr. Nannan Full, the original "Mother Machree" of her son's famous songs, that by name, died recently at her home in Bechurch, Long Island. She was 71 years old. Her son, Ernest R. Bell, died in May, 1927. He was the composer of many popular ballads of which "Mother Machree" was the most famous.

Could Work Together

Jacob Epstein, the sculptor, was reproaching a London artist for his laziness. "You're like a girl novelist I know. You dream your work instead of doing it."

"Introduce me to that girl," said the artist. "We ought to be so congenial."

"Yes," returned Epstein, "you'd make a wonderful couple. You could keep yourself busy illustrating the novel she doesn't write with the pictures you don't paint."

An optimist is a man who thinks the little trunk on the back of the car will hold all his wife will want to take.

The population of England is a little over 700 per square mile; the figure for Wales is 200, and for Scotland 160 per square mile.

Give a sentence, using the word "annual." "Sandy, I'll pay the carfare, annual by the lunch."

Remarkable Increase Is Shown In Number of Homestead Filings In the Four Western Provinces

New Idea For Sanatorium

Cleveland Hospital For Treatment Of Diabetes Is Shaped Like

Huge Ball

The new \$1,000,000 Cunningham sanatorium, which has as its underlying theory increased air pressure as a cure for diabetes, has been formally opened at Cleveland, as a place of treatment for diabetes, pernicious anemia and other diseases heretofore pronounced incurable.

The main compartment of the sanatorium is a huge steel ball, 64 feet in diameter and five stories high. It is a completely equipped hospital. Adjoining the ball is an industrial tank which provides the means of access to the main construction and offers a preliminary test of air pressure to patients about to undergo the cure.

This revolutionary idea in hospitals was introduced eight years ago by Dr. Orville J. Cunningham of Kansas City, Mo. For years, Dr. Cunningham had advocated the use of compressed air for the treatment of various diseases but it was not until he had interested H. H. Timin, millionaire steel man of Canton, O., that he was able to put his idea into effect. Timin agreed to finance the institution after a friend had gone to the Kansas City sanatorium and been treated for diabetes in a small tank Dr. Cunningham had constructed in his own back yard.

After living in the tank, besides the one used as the entrance, that tank the main compartment.

Patients will live in these tanks for a week at a time under an atmospheric pressure of from five to 30 pounds.

After living in the main sphere of one of the smaller tanks for a week, the patient spends seven days at home or in a hotel, before another week in the tanks. This process is repeated until the doctor pronounces a cure.

The Huge Ball and the adjoining

structures are furnished in the interior much after the manner of an up-to-date ocean liner. It has accommodations for 56 persons.

The first floor of the main tank is the dining room.

Three other floors are given over to bedrooms and the fifth is a special recreation hall.

Lighting is furnished through heavy glass portholes.

A Strange Indian Tribe

Inhabitants Of Upper Yukon Country Are Puzzle To Ethnologists

The Peel River Indians, a tribe living in the Upper Yukon country, are a puzzle to ethnologists. These Indians are often as black as negroes, but have long, straight hair and aquiline features. They are cannibals, and permit no mixed marriages.

Whether they are an offshoot of the Hindu race or descendants of a people who came up the Mackenzie from the Arctic, has never yet been established. Today the tribe numbers several hundred and is in prosperous circumstances. Like the Seminoles of Florida, however, they are vanishing because of their antipathy toward intermarrying with other Indians.

Self-Berthling

Dr. Pearson (after bringing him to): "How did you happen to take that medicine, Bastard?"

"You read the sign on the bottle? It said 'Folson'."

"Folson?" "Tessah, but Ah didn't believe."

Dr. Pearson: "Why not?"

Rastus: "Cause right underneath it was a sign what said, 'Lye.'"

WORLD HAPPENINGS BRIEFLY TOLD

A Toronto newspaper opened a fund for the relief of the British unemployed, particularly the miners and their families.

Units of insulin to the number of 126,000, costing \$4,500, were issued by the Ontario Department of Health during last November.

Representatives of the salmon industry of British Columbia estimate that this year's pack will be worth more than \$14,000,000 as compared with \$12,000,000 in 1927.

Major Carl Spatz and his Question Mark crew probably will be awarded Distinguished Flying Crosses for their endurance feat of 150 hours and 10 minutes non-stop flying.

England's oldest resident, William Walker, celebrated his 107th birthday recently. He received a pension from the lord mayor of Nottingham. He was a bricklayer until he retired 23 years ago.

Howard Douglas, pioneer western Canadian, chief motion picture censor of Alberta for 13 years, and a former superintendent of Banff National Park, died at his home in Edmonton, at the age of 78 years.

The completion of the laying of the steel into Churchill, the terminus of the Hudson Bay railway, will be marked by a celebration on a grand scale, it is announced. Plans will be formulated when the end of the work is in sight.

When the agreement with the transportation companies in regard to continental European immigrants expires in 1930 it will not be renewed. In the meantime immigration officials say they will restrict this immigration as far as possible.

A commission appointed to study the possibility of building a tunnel under the Straits of Gibraltar has returned to Madrid with a favorable report. The cost of the tunnel was estimated at 300,000,000 pesetas (approximately \$48,000,000). The tunnel itself would be 20 miles long.

To Check Outlawry

Detroit Policemen To Receive Bounty For Killing Criminals, Caught In Act

Hereafter Detroit policemen who shoot and kill a criminal caught in commission of a crime will be paid a bounty of \$10, according to Police Commissioner Rutledge, who explained that the money is designed to check further outlawry.

The first presentation was made to Patrolman Arthur Updegrave, and Gerald McQuay, who on Jan. 28, were forced to kill a negro when he resisted arrest.

Canadians Are Meat Eaters

Per Capita Consumption Exceeded By Only Three Other Countries

In cattle holdings Canada ranks twelfth among the countries of the world. There are eight countries with more swine than Canada and apparently twenty with more sheep and lambs. The Dominion is exceeded in meat consumption only by Argentina, New Zealand and Australia, the per capita consumption of these countries being respectively 346.2 lbs., 311.6 lbs., and 277.2 lbs., against Canada's 156.3 lbs. Following come the United Kingdom, 127 lbs., France, 115.0 lbs., Germany, 104.2 lbs., Denmark, 100.9 lbs., and Belgium 71.1 lbs. Canada's per capita meat consumption is made up of 68.3 lbs. of beef, having increased to this from 60.9 lbs. in 1910; 81.4 lbs. of pork against 68.7 lbs. in 1910; 6.1 lbs. of mutton and lamb, as compared with 8.7 lbs. in 1910; the total of 156.3 lbs. comparing with 135.5 lbs. in the former year.

A PROBLEM FOR YOUNG MOTHERS

Stomach troubles cause most of the distress of husband and child, and are the greatest problem that a young mother has to solve.

The treatment for these distressing disturbances that disturb his sleep is quick and effective, and allows all perfectly safe.

The absolute safe treatment for disturbances of the stomach and bowels is found in Baby's Own Tablets. Thousands of mothers have had their problem solved through them.

They are gentle and effective, and all injurious drugs and cannot possibly do harm to even the youngest babe—they always do good.

Baby's Own Tablets regulate the stomach and bowels, banish colic, flatulence and indigestion; break up bilious and simple fever, and promote healthy sleep which is so necessary to the welfare of the baby or growing child.

Anxious To Protect Canadian Fishermen

Regulations Aim To Prevent U.S. Fishermen Selling In Canadian Ports

Possible International conference regarding the fishing treaty between Canada and the United States may come as a direct result of the allegation made by Oregon and Washington fishermen of treaty violations on the part of the Dominion on the Pacific Coast which have been forwarded from Seattle to Washington, D.C., and to Canadian Government officials.

The department of Marine and Fisheries has issued the following statement: "We have no desire on the part of Canadian authorities to restrict in any way the privileges of which U.S. salmon trolling boats are entitled in Canadian ports, but where these boats are carrying on their fishing just outside Canadian water or along the Canadian coast they are not being allowed to use such ports for purpose of comfort and convenience and so make them in a large measure for practical purposes useless from which to operate. Seizures were made only when such action appeared necessary to impress the above fact upon the government."

He then goes on to include the word "again" as again the government, and also the shopping term "on approval." There is a further point, the fact that the government may sanction "altruism" as a word because of its universal usage.

"Truly," comments the Manchester Guardian editorially, "our dictionary makers are taller at a sylvan task. Just as soon as they have set neatly upon an enlarged midshipman 'AC' has broken loose at the other end of the menagerie."

At the present time U.S. ports large for practical purposes have been from which to operate. Seizures were made only when such action appeared necessary to impress the above fact upon the government."

Proves Laborious Task

Editor Of Oxford Dictionary Searching For Definitions Of New Words

So many new words have been coined in the past four decades, that thirty pages of the New Oxford Dictionary are necessary. The record only those beginning with the letter "A." This was revealed by Dr. O. T. Onions, who is editing the new supplement to the dictionary.

It was not only such obvious additions as automobile and airplane that have filled the dictionary, but a laborious task. The new words, according to Dr. Onions, include a "multitude of common colloquialisms, technicalities that have become public currency, and labels, discoveries, inventions, names of exotic plants, garments, terms of sport and of the new psychology."

There are, for instance, auto-suggestion, auto-piano, auto-rotom, autogiro, accent in air, to put or get it across, appreciation, the alvered line, apacho, adenoids, aspiridin, senescent, alpha rays, drag addict, airplay, airworthy, Anglo-phobia and accelerometer.

In the original Oxford Dictionary, published in 1858, "adonai" was included but only as an adjective signifying glancing. "Aspidaria" is a plant long known in old-fashioned English homes, but it never before appeared in a dictionary. On the other hand some words used in the dictionary were obsolete.

The other meaning of "airplane" was a plane or wing, while "aerograph," meaning moving picture, is now dead as a doornail.

Dr. Onions is still searching for adequate definitions, quotations and examples for such words as "adonai," "Aspidaria," "aerograph" and "aerograph." Musical terms which puzzle him are atomity and attack.

He thinks he ought to include the word "again" as again the government, and also the shopping term "on approval." There is a further point, the fact that the government may sanction "altruism" as a word because of its universal usage.

"Truly," comments the Manchester Guardian editorially, "our dictionary makers are taller at a sylvan task. Just as soon as they have set neatly upon an enlarged midshipman 'AC' has broken loose at the other end of the menagerie."

FOR COLDS

To break a cold harmlessly and in a hurry try an Aspirin tablet.

And for headache, the action of Aspirin is very efficient, too, in cases of neuralgia, neuritis, even rheumatism and lumbago! And there's no after effect; doctors give Aspirin to children—often infants. Whenever there's pain, think of Aspirin. The genuine Aspirin is Bayer on the box and on every tablet. All druggists, with proven directions.

Physicians prescribe Aspirin; it does NOT affect the heart.

Aspirin is one made pure (registered in Canada) following Bayer's manufacture. While it will harmlessly break down in the stomach, it does not harm against infection. Hence, the tablets will be stamped with their "Bayer Cross" trademark.

Physicians prescribe Aspirin; it does NOT affect the heart.

Winnipeg Newspaper Union

The city of suburban policeman who is inclined to grumble about the size of the territory he has to patrol, should be given a glimpse of the area which has to be covered by the Royal Canadian Mounted Police.

There is given the task of maintaining law and order and administering justice among the scattered settlements in the great regions of the North-West Territories, stretching from the Arctic coast to the southern limit of the Dominion.

Investigations are undertaken each year by the officers stationed there. Two years ago the normal amount of duty for a constable in these territories, but not infrequently the call of the Arctic is so irresistible that the members of the force return for duty again and again.

Fight the Germs with Vapors Before They Can Get a Start

Treat All Colds Promptly But Be Careful Not to Disturb the Digestion With Too Much Dosing

While Flu is so prevalent everyone should take precautions to prevent its further spread. Flu is generally accompanied by a headache, burning eyeballs, and aching joints. But it begins so many times with just an ordinary cold.

Too often, the colds are neglected until they have lowered the vitality and permitted the lurking germs of influenza, or pneumonia to "get a foothold." The only safe plan to attack a cold at the very start is hot bath, a laxative, and a vigorous application of Vick's VapoRub on the chest at bedtime, will usually break up a cold overnight.

External Treatment Best
For hours after Vicks is applied, its ingredients, time-tested remedies, such as camphor, menthol, eucalyptus, thyme and turpentine, are vaporized by the warmth of the body, and inhaled right to the inflamed air passages. At the same time, the ointment acts

through the skin like an old-fashioned poultice, "drawing out" tightness and pain, and helping the vapors to break up the congestion.

Avoid Upsetting Stomach
This simple external treatment cannot disturb your digestion as too much "dosing" is so apt to do. This is doubly important when "flu" is around, for your stomach, as well as your respiratory organs, must be kept in good condition in order to keep your body resistance at its highest level.

For this reason, too, mothers prefer Vicks for children. It can be used freely and often, even on the youngest child, with no fear of upsetting a delicate stomach.

To Help Ward Off the Flu
When influenza is prevalent, you can often prevent infection by sniffing a little Vicks well up the nostrils every night and morning, or before exposure to crowds.

"Where's the bunk-house?" asked Blackie.

"We don't call them bunk-houses any more, we have dormitories," corrected Gillis as he nudged Donald astily.

"A what?" questioned the puzzled Blackie.

"Dormitories," repeated Gillis. Blackie glowered at his boss.

"What are you running, a ladies' seminar?" he questioned sarcastically.

"And another thing, you don't need your blankets. Company furnishes 'em," informed Gillis.

"Well, I tell you one thing right now," declared "Crusy" Jack, "I ain't going to sleep in no bunk-house that forty smelly bunks has wrapped themselves in. What kind of a jail you brought us to, Jack?"

"What I want to tell you fellows," said Gillis, ignoring "Crusy" Jack's remarks, "is this: I want you to stay all summer. None of this running to town to get your teeth fixed, or new suit, see the 'bull game' or to meet your sister who's coming out from the East, and all that old bunk. We got more orders."

"Can that chatter," interrupted "Fighting" Jack with a wide grin. "We're all going to town on Dominion Day, ain't we, boys?"

"You bet!" they roared as one.

Gillis shrugged his shoulders resignedly. "Thought you fellows was getting old enough to have a little sense," he said.

"Too much luck in us yet," Jack demurred Blackie.

"Where is this doo-noo-tory, Jack?" asked Hopla.

Gillis pointed to the log building and the "boisterous" crowd moved noisily up the hill. The men dropped their packs to the ground outside the door, and, shuffling each other, pressed in. The long rows of white beds stood immaculate against the walls, and two white-clothed waiters were sweeping the glossy varnished floor.

"This ain't the right place," growled Hopla. "This is the hospital."

"Hockey players. Use Minors' equipment. The very thing for hurt paches or ligaments."

MINOR'S
"KING OF PAIN"
MINIMENT

W. W. L. 1768

found Connie busily engaged in spitting the earth in search of worms, which she tossed to the swarms of birds that popped on the ground and filled the air about her.

"Scolding" the bold "camp-robbers" that ventured dangerously near the shovel blade, she scattered the soil then, dashed joyously as the birds, the purring of the bees among the clovers, the soft, subdued twittering of the birds, the rustle of the leaves, and the humming of the water, all combined to make one sweet, monotonous sound that lulled him into drowsiness.

Connie sat down near him, the birds all about her.

"How do you get them so tame, Connie?"

"They know that I love them," she replied simply.

"I can't get anything but the corn-cobbers to come near me," said Andy.

"It takes time and patience, Andy. As soon as the birds are assured that you mean no harm, they are eager to be your friends. You'll remember, Dad told you that without means to harm them, they are not so afraid of you. It is equally true that if all the birds should perish, man would soon follow. And, still more wonderful, if we had no insects man could not survive."

Andy came to a sitting posture. "You're saying to me that we should die if we had no insects?" he asked incredulously.

"Surely, Andy, you haven't forgotten what I told you last Sunday about insects carrying the pollen from flower to flower," reproved Connie.

"I've it now!" cried Andy, after a few moments of reflection. "If we had no insects to carry the pollen, we'd starve to death."

"Strike me 'andone' if I ain't wondrous!" said Andy in an awed voice.

Connie explained very simply to Andy the benefits derived by mankind from the various birds. Her discourse proved so interesting to him that he paid little heed to the time until the sun, disappearing behind the trees, warned him that it was time to return to his duties. Regrettably he arose and turned to the trail, Connie walking by his side. A goldfinch, rich in his summer plumage of bright yellow, black and white, hung swooping like a dainty sparrow in a clearer blue than the path. From its bulging little throat came a rippling, bubbling noise like a miniature torrent of cotton.

"Dear, dear, dearie," he called sweetly.

"Oh, you darling!" cried Connie as she clasped her hands in rapture.

"I've been trying to find in nature for several days, Andy, but the little dove seems to have been here."

She made soft chucking sounds as she moved nearer to the beautiful bird. The goldfinch fluttered to Andy's side, perched like a yellow flower on the top of a tall thistle, perked its pretty head and looked up at her with bright shining eyes.

"Dear, dear, dearie," it sang again, then flew with characteristic vivacity toward a clump of willows, twittering sweetly as it called Connie to follow.

"I've to hurry, Andy," said Andy as he looked at his watch. He glanced back at a turn in the trail to see Connie pressing the willows gently aside in her search for the goldfinch.

"Strike me pink! but she is a wonderful girl," sobbed Andy. "I never saw the bird and I never saw her ever saw a life. If I was thirty years younger, two feet lighter, and 'art decent' to look at, I'd fall all over her like a love sick boy."

He smiled broadly at these ridiculous reflections, but there was a tender light in his bright blue eyes.

"The redheads" had been up in the woods looking over the logging operation, and they now came swinging down the hill, their bright shirts flashing in the sun. They were long legs, every inch of them, as Gillis said.

CHAPTER XIII
Andy's study of nature proved to be no idle whim, and Gillis had long since ceased teasing him. All his leisure moments were spent in acquiring facts and theories for his precious and regularly every Sunday afternoon he accented the hill to Walter Wright, often with his collection of the learned Englishman's inspection.

On this afternoon, Walterwright, being in one of his solitary moods, had wandered up the mountain, and Andy

found Connie busily engaged in spitting the earth in search of worms, which she tossed to the swarms of birds that popped on the ground and filled the air about her.

"Scolding" the bold "camp-robbers" that ventured dangerously near the shovel blade, she scattered the soil then, dashed joyously as the birds, the purring of the bees among the clovers, the soft, subdued twittering of the birds, the rustle of the leaves, and the humming of the water, all combined to make one sweet, monotonous sound that lulled him into drowsiness.

Connie sat down near him, the birds all about her.

"How do you get them so tame, Connie?"

"They know that I love them," she replied simply.

"I can't get anything but the corn-cobbers to come near me," said Andy.

"It takes time and patience, Andy. As soon as the birds are assured that you mean no harm, they are eager to be your friends. You'll remember, Dad told you that without means to harm them, they are not so afraid of you. It is equally true that if all the birds should perish, man would soon follow. And, still more wonderful, if we had no insects man could not survive."

Andy came to a sitting posture. "You're saying to me that we should die if we had no insects?" he asked incredulously.

"Surely, Andy, you haven't forgotten what I told you last Sunday about insects carrying the pollen from flower to flower," reproved Connie.

"Strike me 'andone' if I ain't wondrous!" said Andy in an awed voice.

Connie explained very simply to Andy the benefits derived by mankind from the various birds. Her discourse proved so interesting to him that he paid little heed to the time until the sun, disappearing behind the trees, warned him that it was time to return to his duties. Regrettably he arose and turned to the trail, Connie walking by his side. A goldfinch, rich in his summer plumage of bright yellow, black and white, hung swooping like a dainty sparrow in a clearer blue than the path. From its bulging little throat came a rippling, bubbling noise like a miniature torrent of cotton.

"Dear, dear, dearie," he called sweetly.

"Oh, you darling!" cried Connie as she clasped her hands in rapture.

"I've been trying to find in nature for several days, Andy, but the little dove seems to have been here."

swartly foreign labourers, moving aimlessly up the trail, merely curious to see in reply to Andy's cheerful salutation.

"One of Gillis's beloved chuckles," chuckled Andy.

A moment later he stopped suddenly. Connie was up there alone.

For a short interval he hesitated, then resumed his downward journey. "She'd shoot 'is blinkin' end off 'is 'rised to 'arm 'er," he decided.

Just then he heard Connie's voice raised in a quick cry of alarm. Andy jumped as though subjected to a galvanic shock. He turned in mid-air and before he struck the ground his short legs were going through the motion of running. The picture of the struggling in the arms of the burly foreigner made him fairly

"I'm coming, Connie!" he shouted as he tore up the hill.

Donald and Gillis, sitting near the fire enjoying a smoke came to their feet as they heard a faint shout above. For an interval they listened intently, but hearing no further sound they resumed their seats.

Andy slackened his pace as he came to the clearing and saw that Connie was unharmed. She was standing near the labourer with her head bowed over him, as if he had been hurt.

"What's wrong, Connie?" panted Andy.

Andy, looking shocked, "it's the mother bird. I had just found her nest—here it is!" She parted the bushes to disclose a compact, cup-like structure of fine grass and moss placed in a crotch of the tree.

In the centre lay four downy fledglings whose tiny mouths gaped wide to receive the expected bit of food from the mother bird. "Oh, Andy, if she dies the little ones won't live," said Andy.

(To Be Continued.)

An American Knight

Ramsay MacDonald

Labor Leader is Dubbed "Sir Ramsay" at Mayer Park Lodge

If they come to hear of this in the Labor Party of Great Britain, there will be murmurs of protest in the left wing.

A far-flung effect in the next general election. When Ramsay MacDonald was knighted, he was knighted. And by a citizen of the United States.

It happened when the former Prime Minister was a guest at Jasper Park Lodge.

The man who brought him such distinction, a visitor from Cincinnati, was enjoying the Rockies at the same time.

He had a movie clock with him and was having the fun of his life watching the antics of the bear, the goat, and other denizens of the park.

When Mr. MacDonald appeared with his four daughters, the man from Cincinnati leapt up. Here was bigger game. A scoop! When his friends were before the silver screen in their drawing rooms next winter and boasted of their summer's trophies he could afford to smile. And when he unrolled his own reels they would all perish with envy.

The man from Cincinnati wanted an interview, and he got it. Ramsay said he, deliberately but firmly, "Sir Ramsay, would you mind if I took a few movie shots of you?"

The deed was done. But the man was too engrossed to be aware of it.

Mr. MacDonald did not pale at the request. He merely smiled and protested that he was so shak.

"I don't want to bother you," said the amateur movie man. "If you and your daughters just step out of the Lodge and stroll from the path along the shore of the lake."

"Deavert, I'll get you as you go."

So was Ramsay MacDonald knighted and starred in the movies in one day.

Visions Scientific

Trip Around Pole

Captain Bartlett Has Spent Thirty Years in Arctic

A four year scientific coasting expedition around the North Pole was visioned by Captain Robert A. Bartlett, home only a short time from eleven months in the Arctic.

From with his burden, heart-worn, in the strife, Bartlett knows us—how we search for his life.

Consume and sternly punish while we guard, Oh, weary are the paths of earth and hard.

And living hearts alone are ours to guard, At least begrudge not to the sore distress.

The reverent silence of the pining thought, Life, too, is sacred; and he best forgives, Who says, "He errs," but tenderly "He lives."

— Mary Mages Dodge.

Do not keep the slumberer loiterer of your love and tenderness sealed up till after your friends are dead. Fill their lives with sweetness. Speak kind, approving, cheering words while their ears can hear them, and while their hearts can be thrilled by them. The things you mean to say after they are gone, say before they go.

Recipes For This Week
(By Betty Barclay)

EGGS IN NESTS
To 3 cups of left-over mashed potatoes well softened with milk add 1 cup finely chopped ham or bacon, 2 tablespoons finely chopped parsley, 3 tablespoons butter, salt and pepper. Cover the bottom of a well-buttered baking dish and arrange little nests into which gently break an egg. Sprinkle an egg for each person. Allow buttered crumbs over the top and bake in a moderate oven until the eggs are cooked, but not hard.

PRUNE WHIP DELICACY
1 package of orange junket.
1 pint milk.
1 egg white.
1 cup sugar.
1 cup prune pulp.
2 teaspoons lemon juice.

Prepare orange junket according to directions on package and set away to cool. Beat egg white until stiff, add sugar gradually until thoroughly blended. Add prune pulp (prepared by rubbing cooked prunes through a sieve) and sugar. Before serving heap the glasses of junket with prune whip and garnish with sections of orange, if desired.

Should Save Argument
S. Parker Gilbert, Agent-General of Reparations, says that Germany is not going to pay the full costs of the war fixed. That should save much argument at the coming conference.

Keep Foods Deliciously Fresh
Keep your foods—meats, bread, pies, cut meats, etc.—under a covering of Para-Sani Heavy Waxed Paper. You'll be amazed at the length of time they'll stay fresh, delicious! Para-Sani keeps them from staling. Get Para-Sani in the handy, sanitary knife-edged carton. For less exacting uses ask for Appleford's "Centre Pluck". Pucks in steel form.

Ward off Flu and Pneumonia
Neglected influenza colds are dangerous. They may lead to pneumonia. Ward off these ailments by using Para-Sani Heavy Waxed Paper. It keeps your foods fresh and delicious. A single slip proves it.

THE EMPRESS EXPRESS

Published in the interests of
Empress and District

E. S. Service Proprietor A. Haskin

This day, Feb. 14 1929

Reg. Pool is away on a visit to Calgary.

J. Stoney was confined to the house with sickness for a few days last week.

Harold Boyd, left for Saskatoon via Alton, Tuesday, to resume his University studies.

Mr. Murray, the baker, has now recovered from his sickness, and reports also that his family are now convalescent.

C. R. Moore, local station agent is away on a trip to Winnipeg. Mr. L. C. Hall, is filling the position in his absence.

Born-To Mr. and Mrs. John McNeill, Calgary, February 1, a daughter.

Pat Livermore sold his farm in the Social Plains district to David Strom, this week.

Mrs. D. Lush has been confined to the house with the prevailing sickness.

J. N. Anderson returned on Friday from Vancouver, where he had been attending the lumbermen's Convention.

Wm. Rowles left on Monday for Regina, to attend a Convention of the United Farmers of Canada.

The regular monthly meeting of the W.M.S. will be held at the home of Mrs. McPherson, on Wednesday afternoon, February 20th, at 8 o'clock.

Weather of the past week has undergone a welcome change and has been warmer and much more enjoyable. A big relief from the low temperatures we were experiencing.

Here and There

(28)

A skin game—Two young boys living 90 miles northeast of Edmonton started a coyote farm in 1927 by dragging young coyotes out of the ground and confining them in a pen. They put 140 small animals and when their skins were mature sold them for \$12 each.

A southern packing plant specialises upon hams that are shipped to parts of Continental Europe where it is very popular. It has been suggested that the non-descript hams arriving about Southern Alberta be marked for packing purposes. It is a pity someone could not figure out a better way of consuming some of the old motor cars that are loose on the highways.

Twenty old burners measuring overall 97 feet in length and weighing 75,000 pounds have been ordered by the Canadian Pacific Railway and will be in passenger and freight service through the mountains this summer. Each of them will do the work of two or three of the lighter locomotives. They are the largest in the British Empire and will revolutionize transportation in the west, it is predicted.

Victoria is having a mild winter golf tournament open to members of the local clubs and to guests of the Empress Hotel, and the players won't have to play in mittens and fur coats, either. In the east they have a game called winter golf that they play with low and arched on skis or snowshoes, but the golf at Victoria is the legitimate article. The game is played the year round in the equable climate of the Pacific coast.

Urgent and luxurious cars, differing from anything ever known in this country before, will be carried by the two great trains of the Canadian Pacific Railway, the Trans-Canada Limited between Montreal, Toronto and Vancouver, and the Mountaineer, from Chicago to the Pacific coast. It has been announced. The cars will have bath rooms, radio service, lounge and smoking space, and a solarium with view-glass windows.

The sea is constantly productive of tales of adventure. A recent story is that about Commander E. Robinson, C.B.E., of the Canadian Pacific liner Empress of France who turned his ship into the face of a hurricane and went 500 miles out of his course to take aid to a lumber steamer on the Japanese coast. The great liner waited beside the freighter, which had been badly battered by huge waves and some members of whose crew had been injured, but found it impossible for boats to pass between the two ships to convey a doctor. After waiting for half a day the master of the Japanese ship reported that he could make port, and the Empress of France continued on her interrupted voyage.

Ernie Fountain has been on the sick list this past week.

A card from Billy Watson informs us that with his wife and son, he is spending a most enjoyable holiday, and has included a trip to Ireland and Scotland in their pleasures.

Mrs. R. L. Arthur has been confined to the house during the past week with the prevailing sickness that is going the rounds of our community.

Bob Simmons who contracted influenza, suffered a relapse which brought on erysipelas. His condition at times has been very critical. We understand that he is now making good improvement.

Mr. and Mrs. J. Muze and family returned on Saturday from their holiday trip to the States.

Mrs. Morrow, arrived on Wednesday of last week from Montreal, on a few days visit with her mother, Mrs. Wm. Pullen. She returned home on Tuesday.

Saskatchewan Motorists Who Break the Law May Lose Their Licenses

Motorists breaking the law may have their licenses suspended or revoked by the Provincial Secretary under an amendment to the Vehicles Act

passed by the Legislature Thursday.

The object of the amendment is to make the highways safe from "road hogs." It provides for the suspending or revoking of motor licenses at any time (a) on account of the misconduct of the owner or operator of the motor vehicle for which the license is issued; (b) when such owner or operator has been convicted of an infraction of any provisions of the Vehicles Act, the Public Vehicles Act, 1928, the Criminal Code and the Liquor Act, 1928. The Act also provides that no person operating a motor vehicle, shall overtake or pass, at an intersection of highways, any motor or other vehicle travelling in the same direction.

"How do you sell this cheese?"
"I often wonder myself, man."
